Avant Group Receives "B-" Score in CDP 2025 Climate Change Survey

Avant Group Corporation (Headquarters: Minato-ku, Tokyo; President and Group CEO: Tetsuji Morikawa; hereinafter "the Company") is pleased to announce that it has received a "B-" score in the Climate Change category of the 2025 survey conducted by CDP, an international environmental non-profit organization.

CDP is a global non-profit that operates a worldwide environmental disclosure system for companies and municipalities. The results are provided in eight score levels (A, A-, B, B-, C, C-, D, and D-), and are widely used by investors and other stakeholders as an important indicator for assessing corporate environmental performance.

Guided by our corporate philosophy of "Creating a 100-Year Company," the Company aims to contribute to society by supporting the sustainable growth of businesses through the provision of software and services that enhance corporate management, while also striving to realize a sustainable society itself. We recognize that addressing environmental issues, including climate change, is an indispensable material issue in our pursuit of creating a 100-year company.

To date, the Company has expressed its support for the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD) and has been promoting initiatives toward decarbonization, including the calculation and disclosure of CO₂ emissions and consideration of the introduction of renewable energy. The Company views the current score as recognition of these ongoing efforts.

Going forward, the Company will further deepen its analysis of climate-related risks and opportunities that may impact its business, while also contributing to the reduction of indirect environmental burdens by helping customers improve operational efficiency through its software solutions. Furthermore, through transparent information disclosure and effective environmental measures, we remain committed to fulfilling our corporate responsibilities toward the realization of a sustainable society.
