## Positive growth against robust results last year

- In addition to the accumulation of new contracts, the company was able to record additional sales from existing large projects. These led to a higher revenue against record-breaking revenue during the same period last year
- Despite increased staffing and increased costs associated with new office and renovation, profit increased through project quality management. Outstanding orders improved to match previous year

## Robust growth thanks to IT investment boom

- Double-digit revenue growth continues as we receive orders including highly difficult projects reflecting clients' expectation for skilled engineers with us
- Prime order ratio continued to rise, leading to a double digit growth in operating income, but margins declined slightly due to enhanced compensation and increased costs associated with opening of a new office

## Revenue growth started to absorb expansion costs

- As governance enhancement and work style reform penetrate into corporations, both outsourcing of consolidated financial results and other sales such as cash management solutions recorded double digit growth
- The operating income margin deteriorated due to an increase in fixed costs due to an increase in office floor space which marginally improved in the second quarter
